

AI Side Hustle Prompt Kit (Beginner Edition)

Turn AI tools into your weekend income helper.

1. Weekend Side Hustle Finder

List 5 easy side hustle ideas I can start this weekend using AI tools — no prior experience, no coding, and little or no startup cost. Include what tools I'd need for each one.

2. Digital Product Idea Builder

Help me come up with a simple digital product I can create in one weekend with ChatGPT and Canva — something useful like a planner, checklist, or mini guide. Include who would buy it and how it helps them.

3. Step-by-Step Creation Guide

Act like my personal assistant and walk me through creating a digital product from start to finish — brainstorming, outlining, writing, designing, and saving the final version. Keep it simple and beginner-friendly.

4. Product Finishing Touches

Give me a quick checklist of everything I should do before listing my product online — like naming, formatting, file types, and adding a short description.

5. Etsy or Payhip Setup Helper

Write simple step-by-step instructions for uploading my digital product to Etsy or Payhip, including what settings or details beginners often miss.

6. Product Description Writer

Write a short, friendly description for my digital product that makes it sound helpful and easy to use. Include 5 tags or keywords people might search for.

7. Promo Content Starter

Create 3 short social media post ideas to share my new digital product — one for Facebook, one for Instagram, and one for Pinterest. Keep the tone warm and encouraging.

8. Pricing Confidence Coach

Help me decide on a fair price for my first digital product. Suggest a beginner-friendly price range and explain how to adjust based on demand or reviews.

9. Feedback & Improvement Helper

Write a short message I can send to early buyers asking for honest feedback or reviews to help improve my next product.

10. Motivation & Routine Builder

Create a simple 3-day schedule that keeps me on track — from brainstorming on day 1, creating on day 2, and uploading and promoting on day 3.
